## **Ambitions**

I'm a web developer. I've a strong experience in web application development, analysis of customer request, creation of the structure needed to grow up every part of the desired application. I'm expert in database creation, management and implementation.

I worked also as free-lance programmer, managing all activities on my own, including customer contacting, budget draft, entire project creation.

I'm expert in use of technologies such as HTML, PHP, CSS, Javascript, MySQL, JQuery.

I worked also with CMS like Drupal, Joomla.

I'm willing to use and improve my working experiences in a big company.

Kind regards
